

Otter English Lop

Black-Blue-Chocolate-Lilac

Otter—Black, blue, chocolate and lilac. The surface and undercolor of the head, outside of the ears, front of fore feet, outside of the hind feet, and the top and sides of the body are to be as described in the respective self varieties. The Black and Chocolate animals will have orange marking and ticking color, while the Blue and Lilac animals will have fawn marking and ticking color. The triangle is to be orange or fawn. The following may range from white to creamy white, highlighted by orange or fawn as it meets the self color of the body; the belly, nostrils, eye circles, jowls, underside of the tail, inside of the ears, back

of fore feet and the inside of the hind feet and legs. The belly undercolor is to be slate blue or dove gray. Lack of marking color on the tail and the lateral jawline is permissible. Prominent orange or fawn ticking is to be evenly distributed around the chest, sides, and lower hindquarters. The eye color is to be as described in the respective self varieties.

Fault—mealiness on the head, ears, or body; brownish tinge on main body color; faded body color due to molt; fault white or creamy under color devoid of slate blue or dove gray.
